Microsoft Pocket PC and Windows 2003 Mobile		•

> For Internal Use Only

Pocket MP2 Plus Main Features:

Device Flexibility

- > Supports more commonly used and available devices, like Datastream DS-1100, Symbol, Intermec, and more. Provides customers with not only the more popular ¼ VGA vs. ½ VGA units, but also gives customer a choice in ruggedized vs. non-ruggedized handheld PDA's. Lastly, the newer supported devices include integrated bar code scanning which is leveraged throughout the Pocket MP2 Plus application.

Secure Hardware Investment

- > Pocket MP2 Plus supported devices can also be used for Datastream 7i Mobile Solutions.

Communication Protocol Flexibility

- > Supports a variety of means of connectivity including Radio Frequency as well as simultaneous device connections. Now multiple users can upload in different ways (batch, RF, or WAN) all at the same time!

Consistency with MP2 Barcoding Plus

- > Pocket MP2 Plus connects through the same mobile server as MP2 Barcoding Plus. The applications can coexist with a single implementation of a mobile server, both running at the same time and loaded on the same PDA devices.

Improved User Interface

- > Pocket MP2 Plus focuses on an improved user interface that significantly reduces time to complete work orders and other handheld tasks. The application is designed to minimize "clicks" via the stylus and optimize productivity in the field.

Important Notes:

Pocket MP2 Plus Requires a Key Code and CD

- > If a customer doesn't have Pocket MP2 Plus already, this will be supplied to them with the order for Pocket MP2 Plus -> No \$0 order for Pocket MP2 Plus is required.

Will Symbol 3100, 3805, 6100 & 6800 Scanners Work?

- > No, Pocket MP2 Plus works with Pocket PC, ¼ VGA devices only.

Will the Jornada and other clamshell devices Work?

- > No, Pocket MP2 Plus works with Pocket PC, ¼ VGA devices only.

Will the Symbol PPT 2800, 8800, and 8100 Series Work?

- > Yes, but these devices are *highly* not recommended for Pocket MP2 Plus due to memory constraints. The highly recommended device is the Datastream DS-1100 Kit

What versions of MP2 supports the MP2 Mobile Solutions?

- > MP2 Access 2000
- > MP2 6.0 for MS SQL 2000 or MS SQL 7.0
- > MP2 6.0 for Oracle

MP2 Barcode & MP2 Barcoding Plus Comparison Matrix

> For Internal Use Only

MP2 Barcoding Plus Benefits:

Device Flexibility

- > Supports more commonly used and available devices, like Datastream DS-1100, Symbol, Intermec, and more.

Secure Hardware Investment

- > Devices used can also be used for Datastream 7i Mobile Solutions.

Communication Protocol Flexibility

- > Supports a variety of means of connectivity including Radio Frequency as well as simultaneous connections. Now multiple users can upload in different ways at the same time!

Pocket PC vs. DOS

- > Pocket PC is more graphically oriented. This makes user adoption and implementation easier, plus it helps train the user in preparation for an upgrade to Datastream 7i.

Important Notes:

MP2 Barcoding Plus Requires a MP2 Barcode Key Code

- > If a customer doesn't have MP2 Barcode already, this will be supplied to them with the order for MP2 Barcoding Plus → No \$0 order for MP2 Barcode is required

Will Symbol 3100, 3805, 6100 & 6800 Scanners Work ?

- > No, MP2 Barcoding Plus works with Pocket PC devices only...see Page 2

Works with the following MP2 products

- > MP2 Access 2000
- > MP2 6.0 for MS SQL Server 2000 or MS SQL 7.0
- > MP2 6.0 for Oracle

> For Internal Use Only

Printer Kit Facts and Features

Zebra S600

Kit Features

S600 Printer
Ethernet Card adapter
Self-starter label kit- 3" x 1"
(3 rolls & 1 ribbon)

Highlights

This printer can accommodate a full-sized roll of media within the printer, minimizing media maintenance and label contamination by airborne dust or moisture. Lightweight, yet highly durable, the S600 can be easily moved from one workstation to the next, anywhere it is required. Or purchase more than one of this extremely affordable printer for distributed printing throughout your company.

Intermec 3400

Kit Features

3400 Printer
Ethernet Card adapter
Self-starter label kit- 4"x4" sample roll

Highlights

The Intermec 3400 is their best selling printer – and for good reason. Its rugged design, economical price, well-known reliability, and application flexibility make it a smart choice for today's dynamic warehouse, distribution and manufacturing environments.
